Vincent Fezzuoglio

Harriman, NY, 10926 | Vincent.Fezzuoglio@Protonmail.com | (845)309-5272 | Linkedin | GitHub

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems — New York, NY
Master of Science (MS) in Computer Science | **GPA:** 4.00 — May 2027

Pace University, Seidenberg School of Computer Science and Information Systems — New York, NY
Bachelor of Science (BS) in Computer Information Technology | **Concentration**: Software Development | **GPA:** 3.41 — May 2021

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript (ES6+), C#, C++, Java
Frontend: React, React Native, HTML5, CSS3
Backend & Systems: Node.js, Express, FastAPI, ASP.NET Core, REST APIs, Claude API, RAG, Embeddings
Cloud & DevOps: AWS, Azure, Docker, CI/CD, Git, Claude Code, Supabase
Libraries & Databases: PostgreSQL, MySQL, SQL Server, MongoDB
Testing: Jest, Postman API Testing

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals — *Issued Oct 2025*
MIT xPRO: Professional Certificate in Full Stack Development (MERN) — *Issued Aug 2023*

ACADEMIC & PERSONAL PROJECTS

RepairOps – Repair Management System - C#, ASP.NET Core, SQL, React, React Native — *Nov 2025 — May 2026*

- Built a multi-user repair tracking system with real-time status updates across React Native (mobile) and React (desktop) clients, backed by an ASP.NET Core REST API
- Designed normalized SQL schemas and efficient query patterns to manage repair workflows, parts inventory, and role-based access for sales and technician workflows

Document Analysis API – Backend API, FastAPI, Azure, PostgreSQL — *Feb 2026 — April 2026*

- Built REST API for document upload and text extraction using FastAPI and Docker for scalable document processing
- Designed a secure JWT-based authentication layer and modular service architecture for maintainable, extensible backend logic
- Developed AI-ready backend services for document analysis, embeddings, generative AI workflows, and RAG-based processing using FastAPI and PostgreSQL

CyberWatch – AI-Powered Cybersecurity News Curator – Go, React, Anthropic Claude API, Docker — *April 2026 — April 2026*

- Built a full-stack AI-powered news aggregation platform with a Go backend and React frontend, integrating the Anthropic Claude API to retrieve, analyze, categorize, and summarize recent cybersecurity news.
- Designed backend API functionality with server-side caching and rate limiting to reduce external API usage, prevent abuse, and improve application reliability.
- Containerized the frontend and backend using Docker and Docker Compose, with error handling for external API and network failures

VOLUNTEER WORK

Aunt Mary's Storybook – Companions Journeying Together — Remote, USA
Volunteer Software Developer — Aug 2025 — Feb 2026

- Resolved 15+ bugs across authentication, data validation, and role-based workflows using DevTools, logging, and API testing, improving application stability and reliability
- Designed and implemented user-level access logging with pagination, improving system observability and traceability
- Optimized SQL queries and developed 5+ backend features in CodeIgniter 4 (MVC), improving performance and scalability for large datasets

PROFESSIONAL EXPERIENCE

WRTH — Remote, USA
Backend Software Engineer — May 2026 — Present

- Built Stripe and Stripe Connect payment infrastructure for a live auction platform, implementing vendor onboarding, payout routing, Checkout Sessions, and transaction safeguards.
- Designed idempotent checkout processing and payable-amount validation to prevent duplicate and invalid charges during concurrent bidding activity.
- Developed and shipped an Android NFC Companion App using React Native, Supabase authentication, Row Level Security (RLS), and NDEF tag read/write functionality for live-event operations.
- Built and launched AI-powered applications for live events, generating 100 personalized FIFA attendee cards and enabling 100 head-to-head battles through an interactive cosplay experience using OpenRouter and Google Wallet.

Russell Cellular — Warwick, NY
Store Manager — Nov 2020 — Present

- Lead daily operations and a four-person sales team, overseeing training, performance, scheduling, and customer escalations while maintaining strong customer retention and service standards.
